Dear Win_Min

Criterion	Ballpark Attainment Descriptor	Mark
Functionalities and Reliability (25%)	It is a thoughtful application which works flawlessly	9
Development Practice (25%)	Consistent evidence of incremental development and sophisticated reflection in action	9
Usability Practice (25%)	The application is designed to make it extremely useable on a mobile phone. It requires the smallest number of touch events necessary to do what it does - though what it does may be quite sophisticated	9
Usability Analysis (25%)	A reflective document which shows thinking about how usability has been implemented and improved over the period of development	8
	Total	87.5

Feedback

An absolutely wonderful app - very rare that I mark something that I would like to install - but this is exactly it! Even though it is geographically generic - it makes it so simple to find something of relevance and value to oneself in one's own locality. I have found a skating park for instance that I would like to share with my partner. I thought the color choices, in fact all the choices you made to be superb. I don't know if an app like this already exists on the play store - but it should. Extremely well done.
